

近日，莱特币创始人李启威本周三在社交新闻网站 Reddit 发帖表示，他在过去几天已全数出售了手中的莱特币，并捐出了所得款项。

Litecoin price, tweets, and conflict of interest self.litecoin

Coblee  Litecoin Founder 於 8 小时前 發表 

Over the past year, I try to stay away from price related tweets, but it's hard because price is such an important aspect of Litecoin growth. And whenever I tweet about Litecoin price or even just good or bads news, I get accused of doing it for personal benefit. Some people even think I short LTC! So in a sense, it is conflict of interest for me to hold LTC and tweet about it because I have so much influence. I have always refrained from buying/selling LTC before or after my major tweets, but this is something only I know. And there will always be a doubt on whether any of my actions were to further my own personal wealth above the success of Litecoin and crypto-currency in general.

For this reason, in the past days, I have sold and donated all my LTC. Litecoin has been very good for me financially, so I am well off enough that I no longer need to tie my financial success to Litecoin's success. For the first time in 6+ years, I no longer own a single LTC that's not stored in a physical Litecoin. (I do have a few of those as collectibles.) This is definitely a weird feeling, but also somehow refreshing. Don't worry. I'm not quitting Litecoin. I will still spend all my time working on Litecoin. When Litecoin succeeds, I will still be rewarded in lots of different ways, just not directly via ownership of coins. I now believe this is the best way for me to continue to oversee Litecoin's growth.

Please don't ask me how many coins I sold or at what price. I can tell you that the amount of coins was a small percentage of GDAX's daily volume and it did not crash the market.

UPDATE: I wrote the above before the recent Bcash on GDAX/Coinbase fiasco. As you can see, some people even think I'm pumping Bcash for my personal benefit. It seems like I just can't win.

李启威在该条推文中表示：“过去这些年我都尽量不去谈论莱特币的价格，但价格又是莱特币增长的一个重要方面，而每当我谈论到莱特币价格，无论好的还是不好的，都有人指责我是为了图谋个人利益。甚至有人认为我在做空莱特币。某种意义上，对我来说，持有莱特币和评论它是一种利益冲突，因为毕竟我有这么大的影响力。”

李启威还表示，莱特币已让其在经济上受益良多，其财务状况已经够好了，不再需要将个人财务状况和莱特币的成功与否联系起来。

李启威说，他手头除了几枚收藏货币之外，不再持有任何莱特币。“出于以上这些原因，在过去几天里，我已经将自己持有的所有莱特币卖掉或者捐赠出去，也就是说现阶段我不再持有莱特币。当然这不表明我将退出莱特币社区，我还会继续为其发展而努力。”

不过，李启威未在推文中未说明出售的莱特币的数量和价格，但其也表示，出售的数量只占全天成交量一个很小的比例，“并未导致市场崩盘”。

跟据 Coinmarketcap 的数据表明，过去五天莱特币涨幅已经超过9%，达330美元。而受黑客攻击、监管机构干预等一连串坏消息的影响，莱特币周三下跌逾7%，随大部分数字货币走低。
